Error Heatmap

Metric	Value	Interpretation
MSE	0.000509	Lower is better (Ideal: 0)
PSNR	32.93 dB	Higher is better (Ideal: >30 dB)
Correlation	0.0225	Lower is better (Ideal: 0)
SSIM	0.9182	Higher is better (Ideal: 1.0)

Understanding the Metrics:

- MSE: Average squared intensity difference.
- PSNR: Signal strength vs noise ratio (Log scale).
- Correlation: Structural pattern divergence.
- SSIM: Human-perceived quality based on luminance, contrast, and structure.

Heatmap Key: Deep Blue = Identical | Bright Red = Maximum Error.
